** Paraquene (noun)

= a parallel sequence, referring to the string of coexisting events with different outcomes, taking place at the same time, same place: not one of these propositional realities is more valid or evident than any other.

= in science-fiction - refers to the coexistence of (an infinite number of) parallel universes.

= in daily life - hypothetical scenarios when one tries to construct possible situations, imagining what happens at the same time, in another place.
